STOP ICE DAMS PERMANENTLY

Regardless of the type of building, roof, or the severity of the climate, All Weather Armour – Ice Melt Roof and Gutter Systems protect against damage caused by debris and/or ice formations.

Performance

Engineered to provide maximum heat transfer, IceArmour™ Eave Panel II eliminates the dangers of accumulating ice and snow.

Low Cost - Energy Efficient

Save money and reduce impact on the environment with the superior energy of the IceArmour™ Eave Panel II. This unique design maximizes heat transfer while reducing energy consumption.

Elegant Design

The sleek design of IceArmour™ Eave Panel II enhances the natural beauty of your home. Homebuilders, Architects and homeowners now have an elegant alternative to the traditional unsightly and inferior performing zig-zag heat cables used to melt ice in sub-freezing temperatures.

Durability

IceArmour™ Eave Panel II utilizes the most durable materials. Aluminum extrusions provide superior heat transfer and strength to survive in the coldest environments. The Kynar 500/Hylar 5000 paint finish is resistant against chipping or fading.

Safety

Protect your business, your home and family – they are worth it. IceArmour™ Eave Panel II provides guaranteed safety by eliminating the dangers of melting ice on entranceways, walkways and high traffic areas.

Save Money

IceArmour™ Eave Panel II is low cost and provides year round protection. This advanced technology eliminates the expensive repairs caused by large ice formations.

Any Climate - Any Season - We Have a Solution - Just Right for You
